

Constance Pedron

3D Designer

3D Designer specialized in the creation of realistic and technically accurate 3D assets. With a background in game-ready modeling, industrial visualization and project coordination, I create high-quality digital models combining photorealistic rendering with functional and scientific accuracy.

My approach goes beyond visual representation: each model is built with attention to proportions, topology, materials, technical constraints and real-world functionality. I am particularly interested in projects where 3D becomes a tool for understanding, designing and communicating complex objects and systems.

Skills

- Photorealistic rendering
- Scientific and technical visualization
- Real-world scale accuracy
- Material realism
- Asset optimization
- FBX export and pipeline integration
- Texturing PBR
- Lighting
- Project timeline management
- Hard surface modeling
- Organic modeling
- Accurate topology
- UV mapping and optimization
- Game-ready asset creation
- Technical and functional modeling
- Compliance with real-time performance constraints
- Scrum Master – Agile methodology
- Reading and creating technical drawings

Experiences

3D Designer / Project Lead in Luxury Simonella – 02/03/2025 - 12/2025 :

Led more than 50 projects and created high-quality 3D visual assets and realistic environments for prestigious clients including LVMH/Dior, Bouygues, Colas, LVMH, EssilorLucottica, Capgemini, Altarea, Fnac Darty, Brevo, Nexans, Louboutin and Cutera.

- Produced photorealistic 3D models daily with strong attention to material accuracy, lighting, proportions and visual fidelity using several 3D software programs
- Adapted assets according to technical and artistic requirements while maintaining optimization standards.
- 3D modeling of furniture, environments, and technical elements.
- Creation of technical drawings and documentation.
- Compliance with manufacturing constraints and production requirements.
- Collaboration with production teams throughout the development process.
- Optimization of 3D scenes to reduce rendering and processing times.
- Ensuring flawless visual quality from initial concept to final delivery.

09/2024 - 01/2025 Receptionist at Crédit Mutuel Bank in Paris, through Eden

10/2023 - 07/2024 Poster design for Toulouse local authorities.

22/04/2022 - 31/07/2023:

3D Artist / Scrum Master LOGYX - Airport security software

- Managed a multidisciplinary team of 12 artists as an 3D Artist to create and organize a database of more than 10,000 optimized 3D complex objects within one year. (Weapons, computer, Communication antennas, Electronic modules, internal structures, Electronic enclosures, Gears, Motors, Drones).
- Coordinated production workflows, quality control and technical consistency across large-scale 3D projects.
- Ensured that each asset respected modeling standards, optimization constraints and usability requirements.
- Optimization of 3D models to ensure high real-time performance.
- Development of a methodology aimed at optimizing production workflows.

3D Artist – Personal & Collaborative Projects

- Developed realistic and stylized 3D assets for interactive projects and digital environments.
- Created detailed models using advanced sculpting, texturing and rendering workflows.
- Worked on complex objects requiring precision, including mechanical and functional elements.

Skills

- Strong attention to detail and precision
- Ability to transform technical references into accurate 3D models
- Understanding of real-world materials, proportions and functionality
- Combination of artistic sensitivity and technical rigor
- Experience working independently and leading production teams

French – Native

English – Professional working proficiency

Formations

2019 : High School Diploma in Architecture and Construction

2023 :BTS 3D Computer Graphics – Game Specialization ESMA / Addon School Scrum Master

- 3D modeling and digital sculpting
- Low-poly and high-poly workflows
- UV mapping and texturing
- PBR materials
- Lighting and rendering
- Real-time optimization
- Human anatomy
- Hardsurface

2021Webdesigner graphiste Adrar BTS
